ALCOHOL FREE

OUR EXPERTISE IN DEALCOHOLIZATION

Our alcohol-free wines are the result of precision work involving a specific selection of wines and an innovative process to remove the alcohol and preserve the aromas of the grape varieties.

First, we carry out a specific selection and blending process for alcohol-free wines in order to obtain the freshest and most aromatic products possible. Next, the alcohol is carefully removed from the wine by vacuum distillation in a single operation. Our de-alcoholisation process is a gentle method using a very low temperature in order to preserve all the aroma, acidity, flavour and complexity of the wine.

Expressive and elegant alcohol free wines with complex, natural aromas – no additional flavourings.

The finest grapes from the renowned Chardonnay, Grenache, Cinsault, Cabernet and Syrah varieties have been vinified to create these non-alcoholic wines.
